## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 11 is objected to because of the following informalities: The words “for treating” is misspell as fortreating. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6-9 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Schweikard et al. (US 6,501,981).

Schweikard discloses an apparatus and a method for tracking and treatment of target region comprises:

- an MRI apparatus for generating MR images during an MR scan of the subject disposed within an examination region; (see col. 2, lines 10-48).
- an MRI localizer for receiving the image data from the MRI apparatus wherein the target is localized; (see col. 2, lines 10-48 and Fig.2, 4 and 12).

Art Unit: 3768

- a reference marker localizer for non-invasively receiving reference data from a plurality of reference points disposed in proximity to the target wherein the reference points are localized; (see col. 2, lines 48-67 and col. 3, line 66-col.4, line 11).
- a tracking processor for receiving localized data from the MRI localizer wherein a relationship between the reference markers and the target region is generated; (see col. 2, lines 48-67 and col.4, line 50-col.5, line 27).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5, 10 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schweikard et al. (US 6,501,981) in view of Acker et al. (US 6,374,132).

Schweikard et al. disclose substantially all claim limitation set forth in claims 4 and 12. However, Schweikard et al. do not disclose an ultrasound ablator. Acker discloses an ultrasound ablator use for medical procedure such as

Art Unit: 3768

hyperthermia treatment of tissue (see abstract, col. 17, lines 8-43 and col. 13, lines 1-37).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Schweikard's apparatus to include an ultrasound ablator as taught by Acker because the ultrasound ablator allows the apparatus to perform hyperthermia treatment of tissue.
